

CabVista

the taxi computer system

The **CabVista** taxi management computer system is designed for Private Hire & Taxi Operators with anything from **1 to 25** vehicles, and for chauffeur, executive and specialist operators.

It is Windows-based and runs under Windows 95 or later (Win98, 2000, XP, Vista, Win7, etc).

The latest version of this intuitive **easy-to-use** system is now available.

If you would like more information about **CabVista** and its many advanced features, please contact us.

Features include:

- **Take bookings quickly** (Pre-booked, "ASAP", etc),
- See a regularly-updated picture of where all your cars and jobs are (*see the pictures on the reverse of this sheet*),
- Easily **dispatch jobs to cars**,
- Set-up your **Account customers** and take account bookings,
- **Invoice** your account customers, (with optional exports to Sage or QuickBooks), produce statements of each driver's Account Work, etc,
- Automatically build-up a list of all **your local streets**, pubs, clubs, airports, hospitals, etc ...to make booking new jobs fast and efficient ... **or** import a list of all streets in your area from CD-ROM,
- Review at any time the **detailed history** of all your jobs, which are stored automatically for you, including the driver/vehicle that performed the job, pickup dates, times, customer names, etc,
- Re-dispatch "no-jobs", dump cancelled jobs, etc,
- Keep a list of your **regular repeat bookings**, school runs, etc ... set-up once then let the system repeat the booking automatically as required,
- Keep **Driver & Vehicle Databases**, (*see the picture above*), check if a driver is near his MOT or Insurance expiry date, etc,
- Keep track of drivers coming on-duty or going off-duty,
- Export to other Windows programs, if you wish (*Excel, Word*, etc),
- **Multi-user** access an option,
- and much much more ...all in the friendly **CabVista** way.
